Lab 2 Extra Credits Rubrics

CSCI360 Fall 2026

1. Logistics

- Due date of student submission: Oct.12
- 100 points in total, if a student answers problem 3, add 20 points to the final score. Any score > 100 will be treated as 100 (100%).

2. Problem 3 (Extra credit 20 pts)

The extra credit question is submitted in a pdf file with the name "*Lab2 ExtraCredit.pdf*". Besides the two tables required as in instruction, you must provide implementation in function *weighted_a_star_search* with comprehensible comments. Otherwise, you will receive at most 10 points.

Rubric: Because running time is slow for most of students, we only grade for m = 1, . . . , 5. We accept one of the three cases: 1) accumulated running time, 2) total running time for each m, 3) average running time for each m.

- (10 pts) Implementation in general is the correct weighted A^* Search.
- (10 pts) Observed an exponential growth in running time with increase of m.
